

# Sustainability Solution for Ice Cream Market

**Designed & Built in Singapore**

## Current Ice Cream Sales Channel

Most countries have similar ice cream market share for various sales channels. This skewed sales channel scenario need to be more customer-centric, to increase sales and be environmental friendly.

## Growth with SMART & Sustainability

HappyIce's IoT vending solution promotes sustainable growth with SMART features, energy efficient, streamlining inventory, and reduce CO2 emissions per sale

### Vending Machine Specification

Dimension (WxDxH)	720 x 900 x 1980 mm
Weight	260kg
Total Storage Volume	390 liter
Cooling temperature	-25°C
Rated Voltage	220-240 V~
Rated Power	205 watt
Rated defrost power	400 watt
Defrost system	Auto-defrost
Rated Current	0.9 A
Startup surge current	6.5 A
Refrigerant, Amount	R600a, 50g
Climate Class	T (16 to 43 °C)
Max sku & capacity	16sku, 600pcs

## Machine's components

## General Features

- Product Menu: 22" LED ultra clear light box, and 10" digital screen
- MDB compliant
- Cash (bill and coin) and cashless system compatible
- Guaranteed product delivery; if not, no money deduction
- Remote monitoring capability (live-view temperature, sales, inventory etc)
- Purchase-with-Purchase feature: second purchase to enjoy discount
- Available of spoon dispenser and plastic bag dispenser

## Refrigeration

- Energy efficient (80% lower electric consumption than conventional frozen vending machine)
- High efficient refrigerant: R600a
- Auto defrost. During defrost, able to maintain all the time to be below freezing point, to ensure ice cream quality
- 12hrs thermal holding power (during power loss, can hold 12hours to keep ice cream remain safe)

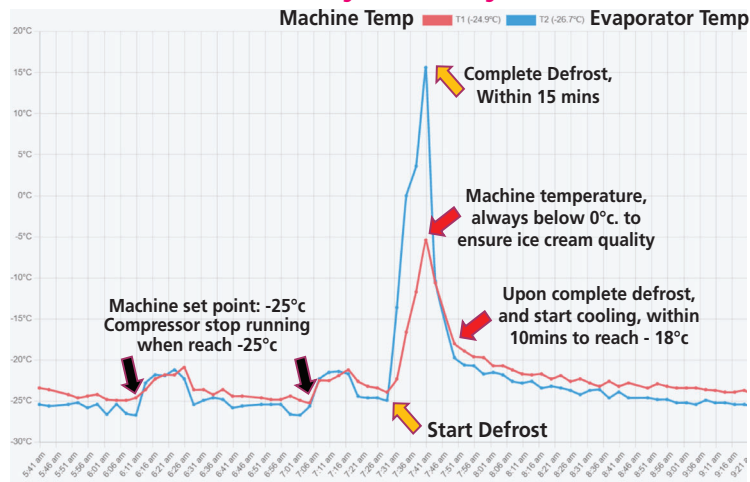

## Live view machine status

Cloud based live-view on machine status: temperature, inventory, sales, error, Coin & Bill equipment condition  
Fully integrated with NAYAX cashless terminal: Provide pre-defined SMS alarm notification Detail Sales report

## Auto defrost cycle, every 15hrs

## Thermal holding power

### Thermal Holding Power (Machine's Temperature after power cut off)

Ice cream temperature would be 2°C to 5°C lower than machine temperature. In the event of loss of electric power, this 12 hours thermal holding power feature, can reduce losses and ensure highest ice cream quality and customer satisfaction

## Temperature (outdoor) Climate class: t (up to 43°C)

### 8 Days Temperature Graph, Machine Under Direct Sunlight
